What Is HousesMadeEasy.com
[EDIT]

HousesMadeEasy.com is a real estate agent Blog and Website marketing site that should demonstrate what you can get from us if you bought one of our packages.

We use Wordpress themes, a.k.a. word press themes as the basis of our sites. We have a custom design department for those with specialty needs. Unlike many of our real estate agent website design competitors who focus on making fancy good looking sites, we fit design and search engine optimization – SEO together.

By putting design and SEO together, you have a chance at being found in Google or Yahoo or MSN when someone does a real estate home search in your area while presenting an appealing look and feel to the visitor. The job for all websites is to answer the following questions: What Do I Do On Your Site? and Why Do I Do It With You? We make sure that our clients answer these questions on the sites we build.

One of our primary themes is Thesis Theme. We hope you try it. We love it.

We look forward to hearing from you.
